Hi Eric,

For NFB, it was my understanding that the gamma scan ranges and circles were good as is when talking with Lindsay - she requested that I make the HTC gamma scan figure colors and ranges the same way as the current NFB gamma scan figure (1x background to 10x background, then greater than 10x background) - which I have done (and included the most recent scanning data).

Maybe I missed something. Do you want the Area 5 rescan data on a figure by chance? If you'd like to have a call in the morning we can discuss and I'll get you whatever you need ASAP.

Hi Guys:

Can I get the most update NFB HPGe soil analysis data? I am not sure if it was sent out but my last saved was from May. Also, I am not seeing updated gamma scan figures for NFB. With the revised color circles and expanded ranges.

Thanks

Regards,

Eric M. Daly
